

Classroom Learning

Real concentration in a hands-on learning environment

Traditional classroom learning methods continue to have tremendous value and appeal. Through Classroom Learning, instructors can alter their examples to fit the learners frame of reference, raise or lower their subject matter coverage to match learner knowledge bases and choose examples most likely to make sense to people sitting in the classroom. New Horizons instructor's ability to elicit feedback from their audience and turn it into an advantage for the entire class is what makes Classroom Learning so valuable.

The Classroom Learning Approach

As the foundation of our Integrated Learning methodology, the classroom experience has become a more enriching, dynamic and valuable learning method for students. Classroom Learning students have their own networked environments, which enable instructors to manage hands-on lab demonstrations and exercises that mirror the professional environment. Additionally, Classroom Learning has been enhanced to include Web-based resources, such as tutorials and simulations, during and after class. After each course, a post-assessment is completed to help gauge return on investment and productivity enhancements. Additionally, New Horizons offers more courses, at more times, in more locations than any other computer training company. Businesses and individuals can choose from hundreds of desktop applications and technical training courses in our learning centers worldwide.

Classroom Learning Benefits for the Students:

- Structured classes, state-of-the-art equipment and controlled facilities provide real concentration in a great learning environment
- Hands-on instructor-led training provides immediate solutions tailored to help students fulfill real-world business projects
- Access to the Student Collaboration Centers provides continuous classroom discussion and learning resources

Classroom Learning Benefits for the Corporation:

- Employees acquire more skills, beyond those needed to pass exams, which help companies save time, money and gain a competitive edge
- Pre-and post-assessments help monitor progress and gauge return on investment
- Certified classroom instructors are constantly tested and re-evaluated to ensure quality and delivery of training
- Hundreds of desktop applications and technical training courses offered at hundreds of locations worldwide

New Horizons Integrated Learning® Combines Multiple Learning Methods for More Effective Results

New Horizons will bring immediate value to your organization through our Integrated Learning approach, which encompasses more than just "taking a class." It's a complete method of training, reinforcing, supporting and validating learning through flexible delivery options including Classroom Learning, Online LIVE Learning, and Online ANYTIME Learning.

We also provide Books 24x7, our online interactive technical reference library, along with hands-on labs, and practice exams using state-of-the-art equipment in the classroom or virtual labs using the Internet. All training is tracked through the Integrated Learning Manager, a powerful Web-based tool that delivers, tracks, coordinates, manages and reports on all employee training, competency levels and development to help you reach your business goals. And, don't forget, courses may be retaken for up to six months from the original class date, absolutely free.

Learn from the Leader

With over 20 years experience, more than 250 training centers in over 50 countries and over 2,200 instructors, New Horizons is the world leader in computer training.
