Microsoft Certified Desktop Support Technician (MCDST)

The Microsoft Desktop Support Technician (MCDST) credential is for professionals who use excellent customer service skills to educate users as well as solve hardware and software problems on the desktop of the Microsoft Windows Operating System. Core Courses (2 exams required)

- 2261 Support Users and Troubleshooting Microsoft Windows Desktop Operating Systems, Exam #70-271
- 2262 Supporting Users and Troubleshooting Applications on a Microsoft Windows Desktop Operating System Platform, Exam #70-272

Microsoft Certified Professional (MCP)

If you are looking to demonstrate your expertise with Microsoft technology, the Microsoft Certified Professional credential provides the foundation for Microsoft's other certifications.

Microsoft Certified Systems Engineer (MCSE)

As a Microsoft Certified Systems Engineer, you're qualified to plan, implement, maintain and support information systems in a wide range of computing environments with Microsoft Windows 2000 and Windows 2003 integrated family of server products.

Microsoft Certified Database Administrator (MCDBA)

The Microsoft Certified Database Administrator credential is for professionals who implement and administer Microsoft SQL Server databases.

Microsoft Certified Systems Administrator (MCSA)

This Microsoft Windows® 2000 or 2003 certification is designed for professionals who implement, manage, and troubleshoot existing Windows 2000 or 2003-based systems, including Windows .NET Server.

The Microsoft Certified Solution Developer (MCSRD)

This Microsoft programming certification is the top-level certification for advanced developers who design and develop leading-edge enterprise solutions, using Microsoft development tools and technologies as well as the Microsoft .NET Framework.

The Microsoft Certified Application Developer (MCAD)

The Microsoft Certified Application Developer credential provides industry recognition for professional developers who build powerful applications using Microsoft Visual Studio® .NET and Web services. This credential can be used as a stepping stone to becoming a MCSRD.

For more information on Microsoft certification, including Windows 2000 or 2003, contact your New Horizons Account Executive for a personal consultation to determine the training path right for you.

Choose the MCSA credential if you:

- Manage and maintain the typically complex computing environment of medium-to large-sized companies.
- Have 6–12 months of experience administering client and network operating systems.

Related job titles: systems administrator, network administrator, information systems administrator, network operations analyst, network technician, or technical support specialist.

Choose the MCSE credential if you:

- Plan, design, and implement Microsoft Windows server solutions and architectures in medium-to large-sized companies.
- Have at least one year of experience implementing and administering network operating systems and desktop operating systems.

Related job titles: systems engineer, network engineer, systems analyst, network analyst, or technical consultant.
